Experience

2023 - Present

Solo Project - It's About Time

Working on my first solo EP, all original songs that I have written I am producing this EP myself working with some session musicians but also playing majority of the instruments myself. I created my own demos and interacted with other musicians to ensure they knew exactly what I needed for the tracks.

2023 - Present

Lost Rockers - Original Punk/ Rock

Bassist

I play bass in the band Lost Rockers, which required learning original tracks previously written and once learned I have the freedom to put my own style on them. I kept them mostly the same but adding my own twists which helped to make my playing of the songs unique.

2019

Decypher - Original Hard Rock/ Metalcore

Guitarist

I co-founded this band playing guitar and occasionally jumped in drums when needed. I cowrote a couple of tracks which we recorded at The Cluny - Newcastle. I also assisted in the creation of the band logo as well as creating some videos of the recording process.

2018

The Wax Offs - Pop Punk Rock Covers

Guitarist

I joined this play which was a really fun band to play with. We took older pop songs and added a punk rock twist to them which were really fun to play live and never failed to get any crowd dancing

2017

Desolation - Melodic Groove Metal

Drummer

I co-founded this band playing drums. This was a new venture for me as I'd always played guitar in bands. The genre and song structure was very different to what I was used to but I committed myself to learning and doing the best I could. I also created event posters for this band which were fairly unique.

2015

Sour Stone - A Tribute To Stone Sour

Guitarist

Sour Stone was a tribute band to Stone Sour. I played guitar and due to issues securing a second guitarist I ended up doing both lead and rhythm including soloing. We secured a number of shows including opening for Slipknot - A Slipknot Tribute. I also handled most of the content creation.

Looking For

I am ideally looking for a full time role in an original band or session musician work.

About Me

Energetic, passionate, forward thinking and creative. I have experience in live performance as well as studio recording. I am passionate about creating the best sounding songs I can as well as telling a story and making each song I write as relatable as possible. I always try to think outside of the box and experiment with new things where possible.
